

ABSTRACT

Combo kits and methods for providing a combo kit. In some aspects, the method of providing the power tool combo kit provides the economic benefit of purchasing power tools in a combo kit while providing the flexibility of purchasing power tools individually.

- 5 The method may include the acts of the provider providing an available group including multiple power tools of various tool models. The customer may review the available group and provide a desired group or customer selection indicating the requested power tools to be included in the combo kit. The method may further include the provider receiving the desired request from the customer including multiple power tools from the
- 10 available group. The provider selects a selected group including multiple power tools from the available group. The selected group matches the desired request. The provider provides the combo kit including the selected group having multiple power tools.
